22) An extract of the proceedings of the Municipality may be sent to the Executive for information. This is a work to be promptly attended to by the Municipality in the interest of sanitation of the town. The work may, if necessary, be spread over a period of five years. It does not appear to be appropriate in carrying out the work of this sort as a test case. [illegible]

23) Off letter to the Dy. Shimoga Dt. cc put up for appl another order [illegible]

24) The Director of public Health in his letter flag Y observes that in view of the growing importance of Bhadravathi town, it is absolutely necessary to fill up the moat & the pits in the town, which is likely to cost about Rs 20,000. ~~The municipality~~

NOTE—Contn Sheet

The Municipal Council on account of their slender finances, is agreeable to bear only 1/4 of the cost, and requests Govt to bear the remaining 3/4 as resolved in the Council meeting dated 21 11 46

The Director has however stated that there was no provision in the budget of this dept of last year to meet this cost

2) The D.C. in his letter dated 29.12.46 also opines that the above work is urgently necessary and recommends the resolution of the Municipal Council for sympathetic consideration of Govt

2) If the prayer of the Municipal Council is granted Govt will have to bear Rs 15,000/- of the cost. Whether this amount can be sanctioned as Govt grant in one year or in a number of years is a point for consideration & whether the Director of Health can make this amount available from his provision

Shimoga, dated 29th December 1946

To

The Secretary to Government,
Revenue Department,
Bangalore

Sir,

Subject - Bhadravati Town Municipality-Special grant of Rs 15,000/- to take up permanent anti-malaria works such as ditch filling and slum clearance work

In forwarding herewith in original D C letter No 177/45-47 dated 22nd November 46, received from the President, Town Municipal Council, Bhadravati in the matter of - sanctioning a grant of Rs 15,000/- from Government, to enable the said Municipality to take up the work connected with the filling up of the ditches and moats at the several quarters of Bhadravati Town with a view to permanently - erradicate malaria, as the existance of the moats have - proved to be the main source of breeding malaria, I have the honour to state that the above aspect of the question was considered by the Municipal Council at their meeting held on 21st November 1946

The Municipal Council have passed a resolution to the effect that it is essential to fill up the ditches in the several quarters of the Town at an estimated cost of Rs 20,000/- To finance the scheme in question they have resolved that Government be requested to bear 3/4 of the total estimated cost by sanctioning a liberal grant for the purpose

I may add that it was one of the request of the - Municipal Councillors, Bhadravati, that was placed, before the Minister for health, when the Municipal Councillors waited on a deputation

As Bhadravati is a growing Town gaining in importance, on account of its premier industrial enterprise in the State and in the interest of the numerous distinguished visitors that visit to this place, the health of the Town demands prior consideration

The incidence of malaria has to be permanently - eradicated and as an effective means of eradication the anti- The Chief breeding places of malarial larvae have to be filled

With their limited income and the other heavy - obligatory commitments, and their straitened finances, the Bhadravati Council do not find it possible for the Municipality to take up such a huge scheme, unless the benign Government comes forward to their aid with a liberal grant The request of the Bhadravati Town Municipal Council, deserves sympathetic consideration from Government

In the circumstances, I request the favour of early orders of Government in the matter

The estimate and other enclosures connected therewith accompany

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Shimoga District

MOTE FILLING - There are many huge motes in the heart of the Town and during the rainy reason water stagnates in these pits consequently effecting the health of the Town. The Municipality has been attempting to fill up these motes in the interest of the health and improvement of the Town But on account of the very heavy expenditure involved we have not been able to achieve the desire success. The Bhadra Health Unit have been operating in our Town and we are glad to say that the condition of the Town with regard to malaria is better than what it was before But the existance of these motes have come in the way controlling malaria more effectively. The District Health Officer has inspected these motes and suggested their immediate filling With a view to improve the general health and sanitation of the Town and also as a permanent anti malaria measure it is necessary to fill up these motes immediately The Municipality hasspent over Rs.5,000/- during the current year for this work and the filling of the remaining motes has been estimated to cost Rs 20,000/-. We request you to kindly give us a special grant of Rs 15,000/- to enable us to take up and complete this important work.

Sir

9 No 5254 / ub

With reference to your letter No L 11720 dated 25-2-47 with enclosures, I have the honour to state that (while filling the huge mote and pits in the town are necessary for the purpose of improvement of general sanitation it is not an important source of anopheline mosquitoes carrying malaria in the town and it is therefore not a permanent anti-malaria measure as far as the town is concerned)

2 But in view of the growing importance of this town I feel it is necessary to improve the environment and towards this end filling of these mote and pits are absolutely necessary

3 I therefore recommend for favour of consideration of Government the request of the unicipality for a grant of 3/4 of the estimated cost of Rs 20,000/- There is however no provision in the budget of the department for making the funds available for purposes of this grant
